EDUCATION

Universidad Panamericana

- ❖ Bachelor of Computer Engineering and Information Systems (2019 - 2023)
- ❖ Postgraduate Degree in Engineering and Project Management (2023 - 2024)
- ❖ Master of Engineering (2026 - present)

PROFESSIONAL EXPERIENCE

Klar - Senior Analytics Engineer (May 2025 - Present)

- Built automated monitoring system for Twilio WhatsApp templates, preventing cost overruns by detecting category changes that increase messaging costs by 3x.
- Led the end-to-end B2B Acquisition Attribution framework for a new Broker referral program, architecting a multi-layer hierarchy to reconcile digital Performance Marketing (UTMs/GCLID) with backend referral codes and ensuring data accuracy for channel-specific commission payouts.
- Architected the B2B BI roadmap and data warehouse layer, enabling self-service analytics for 20+ stakeholders and reducing ad-hoc data requests by 80%.

Klar - Analytics Engineer (Jul 2023 - Apr 2025)

- Engineered a high-throughput Python client to integrate multiple third-party APIs, utilizing AsyncIO, AsyncLimiter, and semaphores to manage rate limits and process data in parallel, reducing pipeline runtime from 2 hours to 20 minutes.
- Designed and built a scalable ETL framework using AWS Glue (PySpark) and dbt to ingest and transform AppsFlyer and Xpend data from S3 into Redshift, processing 10M+ new records daily.

Klar - Junior Analytics Engineer (Oct 2023 - Jun 2024)

- Optimized critical data models by refactoring legacy SQL, improving query performance by an average of 50% and reducing AWS compute costs.
- Established SQL best practices and Git workflows, while providing technical translation to leadership.
- Developed automated interest calculation system for demand deposit accounts, processing \$200M+ MXN weekly by calculating daily accruals based on client segment rates and reported balances

BBVA - Advanced Analytics Intern (Mar 2023 - Oct 2023)

- Utilized PySpark, Teradata, and MicroStrategy to process 50M+ daily rows of payroll customer data, generating statistical reports for INEGI cohorted by state, gender, age, and other dimensions to support national financial inclusion analytics.
- Automated 8+ monthly reports using PySpark with connection to Domo for visualization, streamlining reporting from BBVA Mexico to BBVA Spain and saving 12+ hours of manual work monthly.
- Implemented artificial intelligence models for user churn prevention, including regression and classification models that achieved 40-50% accuracy, outperforming previous models (28-35% accuracy).

COURSES AND CERTIFICATIONS

- ❖ DeepLearning.AI - Introduction to Data Engineering (Oct 2024)
- ❖ IBM Data Science Professional Certificate (Apr 2024)
- ❖ TOEFL - 587 puntos (May 2019)

SKILLS AND INTERESTS

Technologies

Advanced - Python, PySpark, SQL, Teradata, dbt, React, HTML, CSS, JS, AWS Glue, Mage AI
Intermediate - C++, Java, C, Hadoop, Git, Dagster, AWS, GCP, Metabase

Languages

Spanish - Native
English - Advanced

Interests

Data Engineering, Cloud Computing, Big Data, DevOps & Infrastructure, Software Engineering
